

VXPRO

MAP SENSORS (MANIFOLD ABSOLUTE PRESSURE)

VXPRO MAP Sensors deliver **accurate air pressure data to the ECU**, supporting precise fuelling, ignition timing, and turbo control for reliable engine performance. **Suitable for both naturally aspirated and turbocharged engines**, they're built for consistent accuracy and long-term durability.

MAP and boost sensors work in the same way; the difference is their position in the intake system, and in many cases, one sensor performs both roles.

Built to match original equipment performance, VXPRO MAP Sensors **give workshops and distributors reliable quality without compromising margin**.

Backed by a 5-year warranty and supported by TechASSIST and StockASSIST, **they help independents fit with confidence and stay competitive**.
