

SERCK[®]

AUTOMOTIVE

COOLANT FLANGES

A small component with a big responsibility, the coolant flange plays a **vital role in keeping the engine cooling system operating efficiently**. Acting as a central connection point between the engine, coolant hoses and other cooling system components, **it directs coolant flow throughout the system**, helping maintain stable operating temperatures and **protecting the engine from overheating**.

Reliable coolant flow.
Precision-engineered durability.

The Serck Automotive Coolant Flange range is **engineered for dependable sealing, precise fitment and long-lasting durability**. Manufactured from high-quality materials and designed to meet the demands of modern passenger cars and light commercial vehicles.

STOCKASSIST

Coolant flanges are a common replacement item on many modern vehicles, so it's important to carry the right references. With StockASSIST, we help stockists identify the **most in-demand references based on UK vehicle parc data** and real-world service trends.

Here are 10 of the most requested references in our UK range:
